

I am opposed to changes to the broadcast ownership rules that would make it easier for established media companies to expand their control news and information that Americans are allowed to read, see, and hear. I believe that equal access must be maintained, even when the views may differ from that of the management or ownership of the media company. We must be able to hear and express opposing viewpoints on important topics. Accordingly I urge you to maintain the broadcast ownership protections that are in place and have help ensure healthy political debate in our country.
